

Reseal-it[®] Reduce it

On Average The UK Produces

9.5
million tonnes
of food waste

That's a value
of over

£19

billion and generates

more than

25

million tonnes
of Greenhouse gas
emissions in a single year

That's enough food for **18 billion meals**
- Enough to feed the entire UK population 3
meals a day for 11 weeks

It produces Green house gas
emissions equivalent to that produced
by 10 million cars and more than
Kenya's total annual emissions!

41%
of this food is

thrown away because
it hasn't been used in
time before the
product goes 'bad'

Here's how Reseal-it[®] can help reduce food waste & the damage caused to the planet

Fresher for longer

Resealable labels help to keep products fresh for longer in comparison to non Reseal-it[®] packaging, reducing the amount of food thrown away before it can be consumed

Less secondary packaging waste

Reseal-it[®] eliminates the need to repack foods in film, foil or plastic containers making it better for the environment while reducing food waste at the same time

Regulating the food we eat & buy

Resealable packs help to regulate food intakes and allow customers to enjoy their food for longer, cutting down on the food we buy and waste
